

The Biden Administration has instructed the U.S. Department of Education to cease all funding for Hunter Education and the National Archery in the Schools Program based on its interpretation of the so-called, ***Bipartisan Safer Communities Act***.

This is the same Administration that refuses to address this country's growing crime problem but seems more than willing to take rights away from honest and honorable citizens.

We need to let our Members of the House of Representatives and the U.S. Senate know that we expect their support. We need them to understand that if they cannot convince the Administration that funding must be restored, we want them to introduce legislation that places control of the funds with Congress.

I have attached information regarding the loss of funding and a copy of our Legislative Guide to help you find your representatives. Feel free to call me if you need help.

You should also call the White House and tell President Biden you want funding for Hunter Education and the National Archery in the Schools Program restored. The White House comment line is **202-456-1111**.

Make those calls NOW!
